Sir,

With reference to correspondence ending with G O No L 1004/M1 5-30-44 dated 7th August 1931 intimating that the proposal of the Municipality in the matter of having the water supply entirely under the control of the Municipal Council cannot be considered for some years to come I have the honor to state that the order came up before the Council who while recording the order at a meeting held on 16th January 1932 have again resolved that Government be requested to reconsider and pass orders giving control to the Municipal Council In forwarding herewith a copy of the above resolution I may be permitted to state as follows

The Council feel that while they are responsible to Government for collecting the Water tax and paying the entire maintenance charges, they are helpless to do anything in the matter of water supply as the control vests in the Water Supply Department and the best they can do is merely send some recommendations to the latter while the Council are held responsible by the public for any short comings. At the close of the discussion it was complained that it was not the entire control over the water works that was urged to be transferred to the Municipality, but the control over the establishment and staff connected with the City distribution by the Chief Executive Officer of the Municipality, viz , the

the Municipal Commissioner so that prompt relief may be given to the rate payers

The Executive Engineer, Water Supply Division and the Range Officer were present at the meeting of the Municipal Council and explained that the present water supply could not be improved until the Thippagondenahalli project is completed -all the existing mains and submains were replaced by pipes of greater capacity I understand that the supply from Thippagondenahalli is expected very shortly, and the relaying of the Distribution system has to be taken up immediately, probably at the cost of the Municipality. When the Municipality pays the maintenance charges entirely and is made to pay the entire cost of the Distribution system, it is but just that it should have control over the distribution of the water that it pays for I may also state in this connection that the C & M Station Municipality will have control over the distribution from October next I therefore request that you will be so good as to move the Government to reconsider the question once again and accord early sanction of Government to the request of the Council

I have the honor to be,
Sir
Your most obedient servant,

Municipal Commissioner

Forwarded with compliments.

Honorary President
